Career Objective

Motivated Computer Science graduate with practical experience in Python, frontend and backend development, and full-stack technologies including MERN. Seeking an entry-level software development role to apply my problem-solving skills and build scalable, user-centric applications while continuously learning and contributing to organizational growth.

Projects

Role-Based Full-Stack To-Do Management System

Technologies: React, Node.js, Express.js, Fetch API, JWT

- Engineered a full-stack To-Do management application using React and Node.js.
- Designed and built RESTful APIs to handle CRUD operations.
- Maintained persistent task data using structured backend storage.
- Integrated JWT-based authentication to secure API endpoints.
- Enforced Role-Based Access Control (RBAC) for Admin and User permissions.
- Validated authentication tokens using middleware for authorized access.

IMDB Movie Explorer Application

Technologies: React.js, Redux Toolkit Query (RTK Query), React Router, IMDb API, JavaScript, CSS

- Enhanced a dynamic movie exploration web application using the IMDb API to display recent and trending movies.
- Implemented React Router for seamless navigation between movie listings, detailed movie pages, and cast member profiles.
- Utilized Redux Toolkit Query (RTK Query) for efficient API fetching, caching, and centralized state management.
- Refactored components to improve code reusability, maintainability, and overall application performance.

Hybrid Surveillance Mechanism for Missing Criminal Detection

Technologies: Python, CNN, Haar Cascade, OpenCV, Flask, Deep Learning, NMS

- Expanded a real-time surveillance system that identifies missing persons/criminals using facial recognition.
- Integrated VGG-16 for feature extraction and Haar Cascade for detection.
- Generated automated alerts upon detecting high-risk individuals.
- Improved public safety through AI automation and reduced manual monitoring effort

Real-Time Chat Backend (Group & One-to-One)

Technologies: Node.js, Express.js, WebSocket, Socket.IO, JavaScript (ES6+)

- Real-Time Chat Backend.
- Built a scalable real-time chat backend using Socket.IO.
- Implemented private messaging functionality by mapping socket IDs.
- Optimized broadcast mechanisms for group communication.
- Managed in-memory user session storage.

Experience & Achievement

• **Hack Arena 2024 (National Level Hackathon)** | Nov 2024
Organized by IEEE, Guru Nanak Institutions | Theme: Security & Surveillance

• **Winner – Code A Quiz Competition** | Mar 2024
Jyothishmathi Institute of Technology and Science

Python Programming Intern –CSEDGE

(April 2024 – May 2024 | Remote)

| April 20, 2024 – May 20, 2024

- Built 5+ 5+ real-world Python applications focusing on automation and data processing.
- Implemented OOP principles and optimized code performance by 20%.
- Worked with libraries such as NumPy and Pandas for data manipulation.
- Completed AICTE & MSME-certified training with hands-on project implementation.

MERN Stack Intern - Edupoly

| September 2025 – February 2026

- Constructed full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built RESTful APIs and integrated JWT authentication for secure login systems.
- Improved frontend performance by optimizing React components and reducing API response time by 30%.

Education

• B.Tech in Computer Science	2021 - 2025
Jyothishmathi Institute of Technology and Science, JNTUH	CGPA: 8.3
• Minor Degree in Data Science	2023-2025
Jyothishmathi Institute of Technology and Science, JNTUH	

Technical Skills

- **Programming Languages:** Python, Java, HTML, CSS, JavaScript, TypeScript
- **Libraries:** React.js, Formik, Redux, Redux Toolkit, React Router
- **Databases:** SQL, MongoDB
- **Tools:** JIRA, GitHub, VS Code
- **Soft Skills:** Team Collaboration, Analytical Problem Solving, Adaptability.
- **Frameworks:** Next.js, TanStack
- **Backend:** Node.js, Express.js, WebSocket

Certifications

- **Python Essentials** – CISCO Networking Academy
- **Python Programming** – Code Tantra
- **Full Stack Java Development & Machine Learning** – Simplilearn
- **Python Programming Internship** – CSEDGE (AICTE + MSME Certified)
